

Location: Remote/USA**Start Date:** Immediate**Type:** Full Time

Our company is searching for an EAM Consultant to join our practice in a junior role. This individual should be a consultant or professional looking to join a talented team that possesses the ability to work on system implementations and associated projects. This individual can be new to consultancy but should have experience working with Asset Management related functions or have similar training. Your central responsibility as the Junior EAM Consultant will be to deliver on the client's conceptual and logical Asset Management systems and requirements. Your duties may include preparing reports, monitoring client systems, system installations, and the documentation of system controls and testing.

RESPONSIBILITIES AND REQUIREMENTS

- Desire to work in a Technology-related consulting role with Asset Management solutions.
- Gathering information from multiple sources and critically evaluating it, reconciling conflicts, disseminating high-level information into details and distinguishing user requests from their true needs.
- Experience working on EAM software implementation projects is desired.
- Interpreting business needs of customers and translating them into the application and operational requirement with the help of strong analytical skills.
- Communicating and collaborating proactively with clients to analyze information needs and functional requirements and delivering use cases and solution designs as and when required.
- Participating in user acceptance testing and undertaking the functionality testing of new systems.
- Assist with RFP response and oral presentations to current and prospective clients.
- Communicate key goals, defines responsibilities, end deliverables to Project Leadership.
- Participates in the implementation of business processes, initiatives, and strategies.
- Excellent written and verbal presentation skills with the ability to present complex ideas in a clear and concise manner to internal and external audiences.
- Organizational and time-management skills.
- Thorough knowledge of Microsoft Office products.

DESIRABLE QUALIFICATIONS

- At least one (1) years of experience with Asset Management implementations or associated services.
- Bachelor's degree in mathematics, statistics, computer science, economics, psychology, sociology, demography, geography, anthropology, statistics, data science, engineering or a research-related field.
- Can provide examples of work product from an implementation project.
