Our company is searching for a senior level EAM Consultant and Solution Architect to join our practice. This individual should be an experienced Asset Management consultant or professional looking to join a talented team that possesses the ability to work on high-profile client projects. This individual will be in a unique position to help us continue to build our team. Your central responsibility as the Senior EAM Consultant / Architect will be to develop, optimize and oversee the client's conceptual and logical Asset Management systems. Your duties may include preparing solution reports, monitoring client systems, project management, and the design and supervision of system integrations.

We are seeking an individual experienced with examining system requirements and the ability to implement various asset models, strategies and systems. The ideal candidate will also have proven experience in data analysis and data management, with excellent analytical and problem-solving abilities.

RESPONSIBILITIES AND REQUIREMENTS

- Technology-related consulting experience with Asset Management solutions.
- Gathering information from multiple sources and critically evaluating it, reconciling conflicts, disseminating high-level information into details and distinguishing user requests from their true needs.
- Experience working on EAM software implementation projects, Infor EAM experience desired.
- Interpreting business needs of customers and translating them into the application and operational requirement with the help of strong analytical and product management skills.
- Communicating and collaborating proactively with clients to analyze information needs and functional requirements and delivering use cases and solution designs as and when required.
- Participating in user acceptance testing and undertaking the functionality testing of new system.
- Conferring with project managers to define concepts and using enterprise-wide requirements definition and management systems.
- Provides leadership, support and guidance to team members.
- Solid asset management industry knowledge.
- Proven track record of meeting deadlines on projects.
- Provide expertise in Enterprise Asset Management best practices and standards such as ISO-55000, Reliability, and strategic maintenance processes.
- Drive forward projects by acting as a liaison between client and EAMC project teams providing clarity, strategy, and direction on business process and functional solutions.
- Assist with RFP response and oral presentations to current and prospective clients.
- Communicate key goals, defines responsibilities, end deliverables to Executive Leadership.
- Participates in the implementation of business processes, initiatives, and strategies.

Location: Remote/USA**Start Date:** Immediate**Type:** Full Time

- Excellent written and verbal presentation skills with the ability to present complex ideas in a clear and concise manner to internal and external audiences.
- Organizational and time-management skills.
- Thorough knowledge of Microsoft Office products.

DESIRABLE QUALIFICATIONS

- At least five (5) years of experience with Asset Management implementations or associated services.
- Bachelor's degree in mathematics, statistics, computer science, economics, psychology, sociology, demography, geography, anthropology, statistics, data science, engineering or a research-related field.
- At least three (3) years of experience in a given industry sector, experience with government or Public Sector organizations, or working in a consulting or services based environment.
- At least three (3) years of experience compiling and organizing solutions and data information and presenting findings to senior level client management or teams.
- Proven experience in working with Infor EAM, Infor Public Sector CDR (Hansen), and associated technology solutions.

ABOUT EAM CONSULTING INC.
